

Emergency Preparedness Program with **J5 Industries – NY**

The Power to Keep Your Business Uninterrupted

Plan for your temporary power needs with J5 Industries before **severe weather** or other disasters strike. You'll not only benefit from peace of mind by minimizing your risk, you'll also receive pricing discounts on J5's generators, cable, transformers and ancillary equipment.

Different Needs. Different Plans.

Because no two businesses are alike, J5 offers two plans to accommodate most needs. With our rental fleet of Diesel ultra silent rental units from 25kW- 400kW Towable, QuadPack™ 4x250kW Containers, DualPack™ 2x500kW Containers & simplex 1, 1.5 & 2 Mega Watts's, we have the power you need.

Standby Plan

With its lower monthly rate, the standby plan allows customers to pay only for the hours of support they actually use. During the actual emergency, supplied power is charged on an hourly basis. For smaller facilities with short-term power needs, this plan is the most cost-effective.

Fixed Plan

If, a sustained outage causes significant financial impact on your business, this is the plan for you. Ideal for larger industrial businesses, this plan provides up to 160 hours of run-time per month, depending on the length of the contract. And should your power needs exceed the allotted time, we offer add-on hours in 24 hour blocks.

If your business has very specific or niche requirements, contact the professionals at J5 Industries to develop a customized power plan for you to keep your electricity on.

Stay On Top of the Storm and In Control of Your Business

With increasing weather patterns, decreasing power quality and demand concerns, it makes more sense than ever to plan before hurricane season. Making smart, informed decisions today can have a big impact on your tomorrow. With J5i Power Rentals on your side, you'll have what you need to stay on top of the storm and in control of your business or facility while keeping the power on during the storm or disaster.
